Subject: Gorge Dam - First Energy Bulkhead Wall Site Reconnaissance Summary
Attachments: Photo 1.jpg; Photo 1 (5).jpg

Mary Beth and Chris – Yesterday, the First Energy site reconnaissance was also safely performed. We were able to use the MS Teams app on our field team leader's phone to broadcast video from the site and verbally direct her to features we wanted to take a closer look at. It was very helpful and will help us in our planning for the drilling scope of work along the bulkhead wall especially near the Front Street Bridge and the concrete section that is cantilevered over the steel sheet pile wall.

Please let us know if you have any questions.

Today's Summary:

- C. Gross and K. Crivello arrived onsite at 08:45 AM to meet with Mike Wytryszczewski/CoA to open gate
- Took photos of drilling locations for bulkhead forensic investigation
- Video Team Meeting to show virtual site recon of bulkhead drilling
- Team offsite at 12:30 and demobed
 - Total hours onsite: 3.75 hr

Health and Safety:

- Site hazards, uneven terrain, open manholes, etc.

Cheers!

Bill
